FOLDING A CROSS (CRUCIFORM) PARACHUTE FOR ROCKET RECOVERY

1. Spread chute out flat with shroud lines neatly arranged as shown in figure below. Bridle link is placed at corner of lower & left panels as shown below.

2. Fold left panel over as illustrated below.

3. Fold top panel over as illustrated below.

4. Fold right panel over as illustrated below.

5. Fold bottom panel over as illustrated below.

6. Fold in half as illustrated below.

7. Fold in half a second time, as illustrated below.

8. Roll up the canopy toward the bridle link as shown in the following two figures.

Parachute is now ready to be installed into rocket.
